

# GUMMED TAPE DISPENSER

**We understand that  
packaging forms a vital  
part of your business.**

We use our expertise to advise customers on the most effective and efficient packaging solutions for their specific requirements, ensuring your goods arrive in despatch condition.

## BP401

Electronic gummed paper tape dispenser for widths up to 70mm

The KB Packaging Gummed Tape Dispenser moistens the gummed paper tape and dispenses at a predetermined length to suit your packaging. The immediate moistening of the adhesive before it is applied to a cardboard box creates maximum adhesive strength. The adhesive bonds to the fibres in the cardboard making it impossible to reopen the box once applied.

Gummed Paper Tape Machine guarantees a steady and smooth process during packaging and is suitable for use with normal and reinforced wet gummed paper tape. Some tapes have the adhesive on the inside of the reel and some on the outside of the reel. The BP401 will work with both types up to a width of 70mm.

The electronic functions built into the gummed tape dispenser give the operator full control in setting the correct lengths for your packaging and dispenses the gummed paper tape at 30m/min so there is no delay in packing your parcels.

Detail	Specification
Production speed	30m / min
Weight	12 KG
Dimensions	480 x 330 x 280 mm
Power consumption	200-230 V
Suitable for	Wet adhesive tape (standard or reinforced) in 70mm width
