

Steel Strapping

Description

Steel Strapping, also known as Steel Banding, is used to secure very heavy loads, to increase load stability during storage and transit. Use steel strapping when high tensile strength and low elongation are essential.

Stock Code	OSC1650
Description	Strapping Steel Oscillated Wound
Width	16mm \pm 0.1mm
Thickness	0.6mm
Tensile Strength	min 800N/mm ² , avr. 850N/mm ²
Break Stain	min 7680N, avr. 8160N
Coill Weight	ca. 48kg
m/kg	13.27
Coil Width	ca. 63mm
Coils/Pallet	12
Pallet Weight KG	ca. 580kg
