

Steel Strapping

Description

Steel Strapping, also known as Steel Banding, is used to secure very heavy loads, to increase load stability during storage and transit. Use steel strapping when high tensile strength and low elongation are essential.

Stock Code	RW1650
Description	Strapping Steel Ribbon Wound
Width	16mm ± 0.1mm
Thickness	0.5mm
Tensile Strength	min 800N/mm ² , avr. 850N/mm ²
Break Stain	min 6400N, avr. 6800N
Coil Weight	ca. 15.9kg
m/kg	15.90
Coil Width	16mm ± 0.1mm
Coils/Pallet	30
Pallet Weight KG	ca. 635kg
