

Steel Strapping

Description

Steel Strapping, also known as Steel Banding, is used to secure very heavy loads, to increase load stability during storage and transit. Use steel strapping when high tensile strength and low elongation are essential.

Stock Code	RW2580
Description	Strapping Steel Ribbon Wound
Width	25.4mm \pm 0.1mm
Thickness	0.8mm
Tensile Strength	min 750N/mm ² , avr. 800N/mm ²
Break Stain	min 15240N, avr. 16250N
Coil Weight	ca. 40kg
m/kg	6.30
Coil Width	25.4mm \pm 0.1mm
Coils/Pallet	16
Pallet Weight KG	ca. 650kg
