

STATEMENT ON PFAS

(Per- and Polyfluoroalkyl Substances)

Date: 29 July 2026

Per- and polyfluoroalkyl substances (PFAS) are not used in the manufacturing processes at any of our sites, and — as confirmed by our suppliers' own statements — are not intentionally added to any of the raw materials used in the manufacture of our packaging products.

This statement applies across our full range of packaging products, including corrugated cardboard boxes and cartons, protective and cushioning packaging (foam, bubble wrap, void-fill), pallet stability products (stretch wrap, strapping, pallet covers and sheeting), bags and film, postal packaging, and thermal/chilled packaging.

This statement is based on information provided by our raw material suppliers and is provided in good faith. It does not constitute laboratory-verified test data for any specific product; where analytical confirmation is required, this should be requested separately.

Signed on behalf of KB Packaging (UK) LLP

Signature

A handwritten signature in black ink, appearing to read 'D Hammond', written over a horizontal line.
